

retouch: _____

you need to retouch the image(s) using any method discuss in class. you are free to use any other tool(s) not discussed in class to get the best results. this must be done in photoshop.

retouch.a.tif

- keep @ 150 dpi/grayscale
- the area(s) to retouch are the following: (will review in class)
 - sky in the top right corner, coffee ring that is on the church
 - the scratches that are on the church
 - the doors @ the bottom

save as: yourlastnameinitial.retouch.a.tif (non layered, lzw on, as shown in class)

retouch.b.tif

- keep @ 72dpi/cmyk
- remove plane
- remove all copy
- add 6" to top of canvas and add more sky (you don't need to match the sample sky exactly, nor the water when removing the words, but do keep the yellow dots)

save as: yourlastnameinitial.retouch.b.tif (non layered, lzw on, as shown in class)

place both files in a folder: yourlastnameinitial.retouch
